

Dear Windy,

What's the deal on waxing rotor blades? Some pups say wax 'em, some say don't—and others say nothing about waxing.

SFC D.M.T.

Dear Sergeant D.M.T.,

The latest word is that only the Kiowa main rotor blades should be waxed. The OH-58A blades are made of extruded aluminum, which corrodes faster than the steel or aluminum sheet in other chopper blades. Keep the wax off all other rotor blades.
