

## Wash and Wax Blades

YOU TOLD ME  
TO WAX TH'  
BLADES, DIDN'T  
YA?

YEAH-- BUT I DIDN'T  
TELL YA TO POLISH  
TH' WAX!

When the main rotor blades on your OH-58A/C slice thru salt-laden air, corrosion is a big threat.

That's why Para 5-85 in TM 55-1520-228-23-1 (Aug 78) says you should wash the blades, as required, with mild soap—NSN 8520-00-531-6481.

After the wash job, rinse the blades and use a clean cloth to dry them.

Wax the blades, but don't polish the wax. NSN 7930-00-267-5588 will get you a gallon of aircraft wax.
